I am an Oncology Medical-Surgical nurse looking for a role where I can provide quality and evidence-based care. I love Oncology because it is embedded with the aspects of healthcare that I value most: compassion, critical thinking, teamwork, and personal connection. I am always looking for new opportunities to learn and improve my practice. As a nurse, I am given the unique position of helping my patients during some of their most difficult times. With this in mind, I feel it is my duty to do everything in my power to give my patients the best healthcare experience that is possible.
